  obesity, alcohol, smoking, and mortality, 311–317
  school-based cardiovascular disease prevention studies, 14S–31S
  student-parent agreement of parental smoking status, 396–399
Social class, cardiovascular disease risk factor increase in ethnic minority and low socioeconomic groups, 96S–103S
Social origins, cardiopulmonary disease, 4S–7S
Socioeconomics
  employment, blood pressure, and, 107–114
  ethnic misclassification of Hispanics, 200–206
  hypertension and, 22–27
  marital status, mortality risk, and neighborhoods, 343–349
  premature stroke mortality and, 146–153
  race and health status, 322–333
Sodium, dietary cation intakes and hypertension, 479–485
Source of bias, endogeneity and unobserved heterogeneity, 258–266
Specimen bank, biologic, lung cancer risk factors and early detection, 533–541
Splines, nested evaluation of dose-response, 188–193
Statistics
  design and analysis of group-randomized trials, 69S–77S
  end point variables for a community intervention trial, 78S–88S
  endogeneity and unobserved heterogeneity, 251–257
  prostate cancer mortality trends and, 35–45
Streptococcus pyogenes
  ibuprofen and skin and soft tissue superinfections in children with varicella, 440–445
  ibuprofen and skin and soft tissue superinfections in children with varicella (editorial), 437–439
Stroke, familial aggregation, 446–451

AEP Vol. 7, No. 8
November 1997: 582–590

Student recruitment, minority recruitment to epidemiologic programs, 304–310
Study design, end point variables for a community intervention trial, 78S–88S
Suicide attempt risks, benzodiazepines, 568–574
Surveillance, head injuries, 207–212

T
Tea, green tea and serum lipid levels, 280–284
Television, intervention plan media choices, 104S–112S
Theory, theory role in community intervention effects, 89S–95S
Time trends, gastric cancer mortality in European Union, 294–303
Tobacco, lung cancer risk factors and early detection, 533–541
Total cholesterol, total and HDL-cholesterol in elderly men, 417–424
Triglycerides
  green tea and serum lipid levels, 280–284
  parenthood and lipids in older men, 275–279
Tuberculosis, familial aggregation, 446–451

U
United States, cardiovascular disease and, 115–124
Urban population, head injuries, 207–212
Uterine cancer, exercise, occupational activity, and, 46–53

V
Varicella zoster
  ibuprofen and skin and soft tissue superinfections in children with varicella, 440–445
  ibuprofen and skin and soft tissue superinfections in children with varicella (editorial), 437–439
Vitamin B6, vitamins and homocysteine, 285–293
Vitamin B12, vitamins and homocysteine, 285–293

W
Women, employment, blood pressure, and, 107–114
